DESCRIPTION

The HFS24 is three-phase AC output relay (3PST-NO).The relay offer 4 to 32VDC input control, with outputs rated at 10A, 15A, 25A, 40A or 60A.The relays include a LED indicator to provide input status information.All models include an internal snubber. The relays provide 4000VAC opto-isolation, between input and output.Encapsulation, thermally conductive epoxy.

INSTALLATION

1. When mounting the relays side by side,provide a space equivalent to the width of a single SSR between two adjacent SSRs.Otherwise,reduce the load current flow to 1/2 to 1/3 of the rated current.
2. When mounting relays on heat sink surface,first apply a heat conductive grease to the metal back surface of the SSR.Press
3. the SSR firmly onto the heat sink to ensure a good seal.Screw the SSR down to the heat sink.
Next,wire the screw terminals and securely tighten the screws.

PRECAUTIONS

1. Before connecting a load that generates a high surge current, such as a lamp load to the SSR,make sure that the SSR can withstand the surge current of the load.
2. The product data sheet shows the non-repetitive peak value of the surge current that flows through the SSR.Normally,use 1/2 of the non-repetitive peak surge current as the standard value.If a surge current exceeding that value is expected, connect a quick-blowing fuse to protect the SSR.
3. When using the HFS24 for an AC load with a peak voltage of more than 750V,connect the load terminals of the relay to an inrush absorber.
